

### Erratum (12 April 2019)

This document was first published on 11 June 2018. It was modified on 12 April 2019 to include the following corrections:

**Page 36/145 Target 9 Maximum reduction of greenhouse gases (e.g. HFCs) besides CO<sub>2</sub> [Operation]**

*The procurement of devices for the Tokyo 2020 Games **will** ~~is going to~~ be properly planned from the preparation phase to select devices with Non-fluorocarbon refrigerant (natural refrigerant) **as much as possible**.*

\*Reason for amendment: The English sentence was corrected, because it had not been as precisely described as the corresponding sentence in the Japanese version of the Plan.
